Restriction to one of the following invention is required under 35 USC 121.

Group I: Claims 1-3 drawn to compositions containing the isoflavoid or an analogue of chromone compound alone.

Group II: Claims 4-8 drawn to methods for treating cancer employing an enhanced combination of the Group I compound and a cytotoxic agent. Applicants on page 20, lines 12-17 state that "this increase in the mean survival time for the median mouse of the different groups of mice treated with these co administrations is significantly longer than that obtained with the treatments involving genistein or these cytotoxic agents used alone."

If applicants' elect this Group, they are further required to elect a single enhanced combination of one compound of Group I with one cytotoxic agent.

The several invention above are independent and distinct, each from the other, as they have acquired a separate status in the art of treating cancer as a separate subject matter for inventive effect and require independent searches. It is noted that a reference to one enhanced combination of drugs would not be a reference to another enhanced combination of drugs under 35 U.S.C. 103. Further, the claims read on a multitude of enhanced combinations of drugs which would require many field of searches that would be an undue burden on the Examiner. Therefore, restriction for examination purposes is proper.

Applicants are required to make a provisional election even though this requirement is traversed.
